Art Unit: 3682

The disclosure is objected to because of the following informalities: On page 2, paragraph [0008] "FIG 2" should be changed to --FIG 3--.

Appropriate correction is required.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter of claim 11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3682

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, and 14-18 are rejected under 35 U.S.C. 102(b) as being anticipated by

Stephan.

Note particularly column 1, lines 54-64.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-11, 20, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Stephan.

With respect to claims 7, 8, 20, and 21, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the ratio of load bearing elements and compressible rolling elements, as this would have been a matter of routine engineering design based on the amount of prestress desired in the bearing. With respect to claim 9, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the bearing device of Stephan in known devices, including that of steering shaft assemblies.

With respect to claims 10 and 11, Stephan is silent as to the specific composition of the inner and outer raceways. It would have been obvious to one of ordinary skill in the art at the time the invention was made to mount the rolling bearing device of Stephan in known manners, including that of having the inner raceway defined by a shaft, as well as the outer raceway being defined by housing.

Art Unit: 3682

Claims 6, 12, 13, 19, 22, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
